The computer displays a pop up message stating "The Sims 4 is not compatible with this computer." I have a new computer running Windows 7 Home Premium (64-bit). I have an Intel® Core™ i5™ Quad-Core CPU @ 2.66 GHz × 4. I had two accounts before and my old computer had Windows XP Pro (32-bit). I just bought a new copy of the Sims 4 today from Gamestop and installed it, but when I go to play it a pop up appears saying "The program can't. The computer displays a pop up message stating "The Sims 4 is not compatible with this computer." I've installed the Sims 4 on my new PC, and I had the same problem as you. Apparently, Windows 7 is incompatible with the Sims 4. I've tried everything I could find on the Internet, including uninstalling and reinstalling the game, then making sure that every little bit of files is deleted. I also make sure my internet connection is stable. But nothing works. So, I'm thinking that my PC is incompatible with the Sims 4. I'm in Australia, btw. I'm having the same exact issue. This game runs on Windows 7. It runs on Windows 8 (64-bit) and Windows 10 (64-bit). It runs on Windows 8 (32-bit) and Windows 10 (32-bit). It runs on Windows 8 (64-bit), Windows 10 (64-bit), Windows 8 (32-bit), and Windows 10 (32-bit). It runs on Windows 7 (32-bit) and Windows 10 (32-bit). It runs on Windows 7 (64-bit), Windows 10 (64-bit), Windows 8 (32-bit), and Windows 8 (64-bit). Which exact CPU do you have? What exact CPU do you have? Which exact version of the Sims do you have? Which exact version of the Sims do you have 82157476af
