Base game problems:

- no progression, what you're doing in the tutorial mission you're going to be doing for the rest of the game (you'll see less than 5 new enemy types), the "upgrades" you can craft sum up to +1 bonuses to the things you already start with
- no items, there are 4 consumables (out of which 2 are healing potions, and all are useless), and 4 relevant items, which you get only once (most likely in the first mission), as they no longer drop once you have them in your inventory - tying in to this, the 2 legendary item drops should be salvaged for materials as soon as they drop, as this is one of the only "reliable" ways of getting legendary crafting materials, since keeping them prevents them from dropping again

DLC policy is horrible, this game feels like playing a F2P:

- Want to use a full 5 slot party? Tough luck, there are only 4 characters in the base game and the only 5th one is a DLC.
- Want to have some very generous passive permanent bonuses for gold, xp, and combat? Better buy 4 DLCs.
- Want to avoid the horrendous grind for crafting materials for legendary items? Better buy the 4 DLCs that conveniently come with some items already crafted and materials.
- Want to 100% the game's achievements? Better buy the DLC.

. FeelsGoodMan. Nice horror game so far, it looks better than the previous doorways games, scarier and better atmosphere, the only issue I have is the low framerate! I'm looking forward for the updates! recommend it if you like horror games https://www.youtube.com/watch?v=jj6OFWI4MF0&index=1&list=PLUB0wzpkprFRpCex1BX-gstHhYPqdSAr_u611f\u060c5\u7684\u306a\u5b9f\u8a71\u3060\u3088\u3002 I've got a good gaming computer and the game runs like garbage on it. The frame-rate is so dreadfully poor, it makes the idea of DOOM (2016) being run on a Windows XP look like the fastest thing in the world. Like seriously, there's literally NO excuse for this game to run so slow that I have to press the same button on my keyboard a hundred times JUST so I can move to the next chat box or open a door. That alone makes the game one of the WORST games I've ever played in my life....and I can't even bother playing more than the first save point due to how bad it is.

And it sucks because I liked where the game seemed to be going. The graphics were pretty decent too, I just wish that the frame-rate wasn't so god awful to the point where I want to give up and never play this game again. If that problem is fixed (or can be fixed), then let me know. But if it CANNOT be fixed, then I want my money back!. Ardderchog!!!!!! 100000000 hours waiting for match. Allright naval battles with planes, carriers, battleships, destroyers, ptb's, cruisers and subs with a great variation in missions, play as either Japan's Yamato battleship class or fly around in American torpedo bombers, attack convoys as submarine etc. fun arcade like fighting with a bit dated graphics but overall I had a blast.. I can't *****ing believe this mother*****ing ***** game ***** crashes *****ing instantly ***** 3GB download *****ing ***** wasted on a mother *****ing God *****ing soccer mom *****_*****ing piece of *****ing ***** *****.

~~~ \*\*\*\* / 10 ~~~. Don't look no further guys, the game is fun and at this price you can't go wrong.

I never played a DnD board game, only the table top version, so I wasn't sure what to expect. It's definitely different than the Baldur's Gate and Cie, yet the mechanics are very interesting. Higher difficulties pose a real challenge, there are no cookie-cut build here. I love the explore concept behind it, it's rewarding yet very dangerous. Overall, the experience has been very positive and I am looking forward to push the game further! And again, at this price point, it's a no brainer!

This is game has potential but sadly it's grammar is horrid. It looks like it was translated from chinese to english using google translate. It's very difficult to get into the mood of the story due to the grammar.. This game is comedy gold. Play it with a partner for a better experience. Wow WOW OMG this engine is a work horse to replace all work horses in train simulator BMG you have done so well this loco is more than worth the wait. Lots of stock, good looking fantastic sounding locomotive. No faults at:

Jacobite Warrior Has Returned

120V10 for effort BMG. Probably the most useless season pass ever, still had to purchase wild run and calling all units. Waste of money, not worth it.. Can't even get passed the main menu, it crashes immediately after pressing start game, I'm glad I bought this on sale and forgot about it for a year. if i had paid more than \$2 I'd be pretty fuccking pissed
